An Introduction to Statistical Learning: with Applications in R (Springer Texts in Statistics) Gareth James, Daniela Witten, Trevor Hastie, Robert Tibshirani

An Introduction to Statistical Learning provides an accessible overview of the field of statistical learning, an essential toolset for making sense of the vast and complex data sets that have emerged in fields ranging from biology to finance to marketing to astrophysics in the past twenty years. This book presents some of the most important modeling and prediction techniques, along with relevant applications. Topics include linear regression, classification, resampling methods, shrinkage approaches, tree-based methods, support vector machines, clustering, and more. Color graphics and real-world examples are used to illustrate the methods presented. Since the goal of this textbook is to facilitate the use of these statistical learning techniques by practitioners in science, industry, and other fields, each chapter contains a tutorial on implementing the analyses and methods presented in R, an extremely popular open source statistical software platform.

Two of the authors co-wrote The Elements of Statistical Learning (Hastie, Tibshirani and Friedman, 2nd edition 2009), a popular reference book for statistics and machine learning researchers. **An Introduction to Statistical Learning** covers many of the same topics, but at a level accessible to a much broader audience. This book is targeted at statisticians and non-statisticians alike who wish to use cutting-edge statistical learning techniques to analyze their data. The text assumes only a previous course in linear regression and no knowledge of matrix algebra.

From reader reviews:

Shannon Batiste:

Do you have favorite book? For those who have, what is your favorite's book? Publication is very important thing for us to understand everything in the world. Each book has different aim or goal; it means that e-book has different type. Some people really feel enjoy to spend their a chance to read a book. They can be reading whatever they get because their hobby is definitely reading a book. Why not the person who don't like reading through a book? Sometime, man or woman feel need book once they found difficult problem or maybe exercise. Well, probably you'll have this An Introduction to Statistical Learning: with Applications in R (Springer Texts in Statistics).

Loretta Manson:

In this 21st century, people become competitive in every way. By being competitive right now, people have do something to make these survives, being in the middle of the crowded place and notice by simply surrounding. One thing that occasionally many people have underestimated that for a while is reading. Yeah, by reading a e-book your ability to survive raise then having chance to remain than other is high. For you who want to start reading the book, we give you this An Introduction to Statistical Learning: with Applications in R (Springer Texts in Statistics) book as starter and daily reading publication. Why, because this book is usually more than just a book.

Ryan Dewitt:

Here thing why this kind of An Introduction to Statistical Learning: with Applications in R (Springer Texts in Statistics) are different and reputable to be yours. First of all reading through a book is good but it really depends in the content of it which is the content is as delightful as food or not. An Introduction to Statistical Learning: with Applications in R (Springer Texts in Statistics) giving you information deeper including different ways, you can find any book out there but there is no e-book that similar with An Introduction to Statistical Learning: with Applications in R (Springer Texts in Statistics). It gives you thrill reading through journey, its open up your own personal eyes about the thing which happened in the world which is might be can be happened around you. You can actually bring everywhere like in park your car, café, or even in your way home by train. Should you be having difficulties in bringing the paper book maybe the form of An Introduction to Statistical Learning: with Applications in R (Springer Texts in Statistics) in e-book can be your choice.

Sheri Williams:

Spent a free time to be fun activity to try and do! A lot of people spent their leisure time with their family, or their very own friends. Usually they accomplishing activity like watching television, planning to beach, or picnic from the park. They actually doing same every week. Do you feel it? Do you wish to something different to fill your own personal free time/ holiday? Could be reading a book could be option to fill your no

cost time/ holiday. The first thing that you ask may be what kinds of e-book that you should read. If you want to consider look for book, may be the reserve untitled An Introduction to Statistical Learning: with Applications in R (Springer Texts in Statistics) can be good book to read. May be it could be best activity to you.
