'Business responses to regulation is a key area of social science research. Parker and Nielsen's collection brings together an excellent group of scholars with innovative, and I believe highly influential contributions that problematize the relations between regulation and compliance. The collection is a highly welcome addition to our field, that will redefine the research agenda on compliance. A significant achievement that will help to improve policy making and frame the scholarly research agenda for the years to come.'

A must read for both academics and practitioners, this ground-breaking collection firmly establishes a scholarly field of compliance studies.'
