Matrix Theory and Applications with MATLAB

Darald J. Hartfiel

Matrix Theory and Applications with MATLAB Darald J. Hartfiel

Designed for use in a second course on linear algebra, *Matrix Theory and Applications with MATLAB* covers the basics of the subject—from a review of matrix algebra through vector spaces to matrix calculus and unitary similarity—in a presentation that stresses insight, understanding, and applications. Among its most outstanding features is the integration of MATLAB throughout the text. Each chapter includes a MATLAB subsection that discusses the various commands used to do the computations in that section and offers code for the graphics and some algorithms used in the text.

All of the material is presented from a matrix point of view with enough rigor for students to learn to compose arguments and proofs and adjust the material to cover other problems. The treatment includes optional subsections covering applications, and the final chapters move beyond basic matrix theory to discuss more advanced topics, such as decompositions, positive definite matrices, graphics, and topology.

Filled with illustrations, examples, and exercises that reinforce understanding, *Matrix Theory and Applications with MATLAB* allows readers to experiment and visualize results in a way that no other text does. Its rigor, use of MATLAB, and focus on applications better prepares them to use the material in their future work and research, to extend the material, and perhaps obtain new results of their own.

From reader reviews:

Diane Adams:

Do you have favorite book? Should you have, what is your favorite's book? Publication is very important thing for us to know everything in the world. Each book has different aim or goal; it means that guide has different type. Some people experience enjoy to spend their time for you to read a book. They are reading whatever they consider because their hobby is usually reading a book. Think about the person who don't like reading through a book? Sometime, person feel need book after they found difficult problem or exercise. Well, probably you should have this Matrix Theory and Applications with MATLAB.

Ronald Griffin:

With other case, little people like to read book Matrix Theory and Applications with MATLAB. You can choose the best book if you want reading a book. So long as we know about how is important some sort of book Matrix Theory and Applications with MATLAB. You can add information and of course you can around the world by just a book. Absolutely right, simply because from book you can learn everything! From your country till foreign or abroad you will be known. About simple matter until wonderful thing you could know that. In this era, we can easily open a book or maybe searching by internet unit. It is called e-book. You need to use it when you feel uninterested to go to the library. Let's learn.

Kimberly Duda:

The book Matrix Theory and Applications with MATLAB can give more knowledge and information about everything you want. So why must we leave the good thing like a book Matrix Theory and Applications with MATLAB? Several of you have a different opinion about reserve. But one aim this book can give many facts for us. It is absolutely correct. Right now, try to closer with the book. Knowledge or data that you take for that, you can give for each other; you can share all of these. Book Matrix Theory and Applications with MATLAB has simple shape but the truth is know: it has great and large function for you. You can look the enormous world by start and read a publication. So it is very wonderful.

Harold Thompson:

Reading a reserve can be one of a lot of activity that everyone in the world adores. Do you like reading book consequently. There are a lot of reasons why people enjoyed. First reading a guide will give you a lot of new info. When you read a e-book you will get new information simply because book is one of numerous ways to share the information or maybe their idea. Second, reading through a book will make you more imaginative. When you studying a book especially hype book the author will bring someone to imagine the story how the people do it anything. Third, you could share your knowledge to others. When you read this Matrix Theory and Applications with MATLAB, you are able to tells your family, friends and soon about yours book. Your knowledge can inspire the mediocre, make them reading a publication.
